SUMMARY

Senior AI engineer fluent in development of RAG systems, AI agents, MCPs, support copilots, and NLP/forecasting engines. Expert in designing and implementing AI/ML solutions with a strong developer mindset for sellers, analysts, and strategists in retail, pricing analytics, and martech spaces. 4+ years building systems with proven scalability and enterprise adoption.

WORK EXPERIENCE

ALTIMETRIK CORP.

San Francisco, CA

Senior AI Engineer - Product & Innovation

Jan 2026 - Present

- Led **strategic technology partnerships with OpenAI & Anthropic** (upcoming), driving adoption of advanced AI capabilities across the organization by spearheading the development of POCs and reusable accelerators using latest tools and services.
- Spearheaded an R&D program to **operationalize a Snowflake-native ontology** semantic KG platform for telecom data turning database metadata and business definitions into a **governed semantic layer that accelerates analytics and AI adoption**.
- Established **enterprise-grade governance and auditability** by implementing a human-in-the-loop change system where ontology/schema changes are executed as reviewable Snowflake DDL, **improving trust, compliance readiness, and repeatability** while accelerating stakeholder adoption across teams.

Agentic AI Productivity Platform for a Major American Multinational Snack Company (AWS AgentCore, AWS QuickSuite Chat Agents)

- Led a 5 member team to architect and deliver an enterprise-ready AgentCore MCP runtime integrated with AWS QuickSuite, **enabling guardrail-governed Bedrock image generation and SharePoint retrieval** with source-linked outputs.
- Established secure-by-design integration patterns, reducing credential exposure and accelerating enterprise rollout readiness.
- Drove **productivity impact** via self-serve chat workflows targeting **30–50% reduction in time spent searching** internal SharePoint policies/docs and reducing creative asset turnaround from hours to minutes through automated image generation + S3 delivery.

AI Engineer

Nov 2024 - Dec 2025

Lululemon - AI Powered Workflow Automation Solution for Feature Change Requests (LangGraph, LangSmith, OpenAI LLMs, AWS Bedrock, ChromaDB, GitHub MCP)

- Architected **GenAI-powered change request automation framework** using LangGraph to orchestrate LLM agents across parsing, impact analysis, and SQL generation - **reducing cycle time by 60–70%** and eliminating manual processes across analysts, engineers, and QE teams.
- Engineered **dual retrieval architecture** with ChromaDB (RAG) and Neo4j lineage graph, integrated with OpenAI/AWS Bedrock models and LangSmith observability to deliver **auditable SQL bundles with automated rollback plans**.
- Drove enterprise adoption** via GitHub MCP and TypeScript UI, empowering analysts to self-serve schema changes - **cutting turnaround from weeks to days** and freeing engineers for strategic work.

Customer Meeting Prep Agent for an Enterprise Monitoring Platform (OpenAI Agents SDK, Pinecone, AWS, GitHub Actions)

- Architected modular ingestion pipeline integrating 5+ data sources to vectorize 100K+ user story fragments, powering a **context-aware GenAI assistant** that **reduced sales prep time by 45–50 minutes per meeting** and increased deal win rates.
- Engineered agentic workflow using OpenAI's Agents SDK and Pinecone Vector DB to dynamically synthesize meeting-tailored insights, **boosting call personalization and seller confidence** across the organization.
- Standardized AWS deployment via GitHub Actions into a **reusable enterprise template**, improving implementation velocity by 60% and enabling parallel adoption by adjacent teams while mentoring 2 engineers on productionization.

Customer Support Assistance for a Prominent Pricing Analytics Company (AWS, Pinecone, OpenAI Custom GPTs)

- Leveraged OpenAI embedding models and Pinecone to **create a vectorized knowledge base** by structuring and ingesting approx. 100GB of historical support data spanning multiple formats.
- Reduced manual support search time** by 75% by delivering a RAG-based CustomGPT assistant, enabling **faster case resolution**.

CARLSON ANALYTICS LAB

Minneapolis, MN

Analytics Lead

Jul 2023 - May 2024

Impact Analysis for Insiders Loyalty Program for a major Minneapolis mall. (Python, SQL, PowerBI, EDA, JIRA)

- Led **cross-functional analytics initiative** aligning marketing, engagement, and strategy teams to enhance loyalty program ROI through data-driven segmentation and personalization strategies.
- Deployed **K-Means clustering on 13K+ insiders**, increasing targeting precision and campaign efficiency by 30%.
- Designed **personalized promotional strategies** using association rule mining, unlocking a 23% surge in engagement.

ALTIMETRIK INDIA

Bangalore, India

Associate Data Scientist

Nov 2020 - May 2023

Clients: Leading Japanese sportswear & apparel company and a leading Canadian athleisure designer & manufacturer. (PyCaret, RNN, ML explainability, NLP)

- Delivered \$150K in cost savings by optimizing **SKU planning** using ML pipelines. Boosted quarterly profits by 18% via **seasonal product forecasting** with LSTM models.
- Reduced **inventory re-stock delays** by 70% (from 7 to 2 days) using Python-based time series models. Saved \$70.5K through BERT-based **employee sentiment classification**.

Client: CleverTap – US customer lifecycle management & marketing services company (BigQuery, CI/CD, Spark)

- Engineered **churn prediction** models using decision trees that retained \$150K in annual revenue. Built automated **customer journey pipelines** in BigQuery, realizing \$400K in savings annually through faster analysis of 14M+ monthly records.

TECHNICAL SKILLS PORTFOLIO

Strategic Technology Leadership

- GenAI Systems Architecture | Enterprise AI Strategy & Deployment
- ML Lifecycle Ownership | Cloud-based MLOps (AWS, GitHub Actions)
- Cross-functional Enablement | Knowledge Scaling | Technical Mentorship

Advanced AI, ML & Analytics

- Retrieval-Augmented Generation (RAG), Prompt Engineering, Agentic AI Design
- LLM Orchestration: OpenAI Agents SDK, LLaMA, BERT, Custom GPTs
- Predictive Modeling, Demand Forecasting, NLP, Churn Prediction
- Machine Learning: LSTM, RNN, Decision Trees, PyCaret, Model Explainability

Enterprise Infrastructure & Platforms

- Vector DBs: Pinecone — Data Lakes & Pipelines: S3, Snowflake, BigQuery
- Cloud: AWS (Lambda, EC2), GCP, Snowflake Cortex — CI/CD: GitHub Actions, Airflow
- Databases and Warehouse: Snowflake, MySQL, PostgreSQL
- IDEs and Editors: Cursor AI, Trae, VS Code, PyCharm

Domain & Business Expertise

- Industry Focus: SaaS, Retail & Apparel, Martech, Loyalty Programs
- Business Applications: CX Optimization, Sales Enablement, Operational Forecasting
- Strategic Insight Generation — Enterprise Data Activation

EDUCATION

CARLSON SCHOOL OF MANAGEMENT, UNIVERSITY OF MINNESOTA

May 2024

Master of Science in Business Analytics

UNIVERSITY OF PUNE, INDIA

May 2020

B.Eng, Computer Engineering
